

0.6: New note in Single page app diagram

sequenceDiagram

```
participant browser
participant server
browser->>server: POST https://studies.cs.helsinki.fi/exampleapp/new\_note\_spa
activate server
server-->>browser: response with HTTP status code 201 created
deactivate server
```

Note right of browser: event handler creates a new note, adds it to the notes list with the command `notes.push(note)`, rerenders the note list on the page and `sends the new note to the server`
